

Standard Felt Filter Bags

AXEON Standard Felt Bags are designed with no-bypass welded seams that eliminate the possibility of fluid bypass through needle holes. The filter construction is sturdy, allowing it to withstand higher solid loading. Bag filters are versatile and can be used in housings or open filtration systems.

Benefits

- Full Line of Felt Materials and Micron Ratings
- Conventional Sewn Bags or the Welded Seam Bags Available
- Heavy Duty and Extended Life Designs Available to Suit your Filtration Needs
- Polypropylene Filter Bag with 100% Polypropylene Rigid Insert and Welded Seam Construction

Product Specifications
