

L1-SERIES REVERSE OSMOSIS SYSTEMS

AXEON® L1-Series Reverse Osmosis Systems are a cost-effective solution for light commercial reverse osmosis applications such as coffee, tea, food preparation, misting, hydroponics, detailing and more.

AXEON L1-Series Reverse Osmosis Systems feature a compact wall mount space saving design and comes pre-assembled and ready for immediate service with simple utility connections. These systems are available in capacities of 200 and 300 gallons per day and feature a single pump design for reliable performance. Each model is engineered with quality AXEON components including fiberglass (FRP) membrane housings, extra low energy membranes, pressure gauges, filters and housings.

- A. Low temperatures and feedwater quality, such as high TDS levels will significantly affect the systems production capabilities and performance. Computer projections must be run for individual applications which do not meet or exceed minimum and maximum operating limits for such conditions.
 B. Product flow and maximum recovery rates are based on feedwater conditions as stated above. Do not exceed recommended permeate flow.
 C. Does not include operating space requirements.
